EDUCATION

Guru Gobind Singh Indraprastha University
B.Tech., *Computer Science (IIoT)*

Jul 2021 - Jun 2025
GPA: 82.5%

SKILLS

Programming Languages: Python, SQL, Kotlin, Java, C, MATLAB
Frameworks & Libraries: ReactJS, TensorFlow, PyTorch, LangChain, Hugging Face, Llama-Index, Autogen, Micronauts
Databases: PostgreSQL, MySQL
Tools & Software: Databricks, Tableau, Power BI, Git, Postman, Docker, Sora, Veo, FFMPEG
Cloud Platforms: AWS, GCP, Azure

WORK EXPERIENCE

Magicbook Technologies | AI Software EngineerMay 2025 -

- Designing and refining AI agents to enhance student learning through interactive quizzes and personalised learning
- Building structured grading systems (e.g., for ENEM essay evaluation) aligned with official rubrics.
- Designed and refined AI agents for interactive quizzes, achieving a 90% improvement in student writing scores.
- Developing LLM-powered tools that transform notebook inputs into interactive study aids

Inventic AI | AI Engineer InternMar 2025 - May 2025

- Designed AI-driven agents to streamline fintech processes and boost customer engagement.
- Built MCP-based models enabling contextual decision-making and actionable insights.
- Enhanced customer profiling and analytics for financial services clients.

Nikah Forever | Data Analyst InternJan 2025 - Apr 2025

- Created a RAG-based AI assistant to automate SQL generation, cutting query time by 40%.
- Integrated cloud platforms (AWS, GCP) and Databricks for scalable pipeline processing.
- Empowered leadership with real-time dashboards and metrics using AI-backed analytics.

Zummit Infolabs | Gen AI InternOct 2024 - Jan 2025

- Developed an NLP chatbot, reducing customer query response time by 30%.
- Streamlined internal workflows through automation, boosting operational efficiency.
- Collaborated on robust model deployments achieving 95% uptime across use cases.

PROJECTS

MySQL MCP System for Business Analytics

- Constructed a context-aware querying system using LLMs for dynamic business intelligence.
- Enabled context-aware SQL query generation using LLMs, improving query efficiency.

AI-Powered Cold Email Outreach Tool

- Automated email campaigns by tailoring messages for personalized via AI agents.
- Utilized large language models(LLMs) to craft tailored messages, improving engagement.
- Boosted engagement rates by personalizing communication based on email marketing context

AI System for Personalized Educational Reels Using Children's Toys & Drawing

- Developing an AI-powered system that creates short educational video reels for children using images of their own toys, sketches, and drawings as primary visual inputs
- Leveraged multimodal LLMs to generate age-appropriate educational narratives aligned with learning objectives (alphabets, numbers, morals, basic science)

Two-Layer OCR Intelligence Pipeline for Handwritten Academic Notes

- Developed a two-layer OCR post-processing system for scanned handwritten academic notes.
- Layer 1: Context-aware cleaning, noise removal, and factual correction for mobile readability.
- Layer 2: Converted cleaned content into precise LaTeX recreations, preserving original layout, equations, and diagrams

CERTIFICATIONS & ACHIEVEMENTS

- Best Paper Award — AI-based computational analysis of Shreemad Bhagwad Geeta
- HackerRank Gold Badges – Python, SQL, and Problem Solving (Top 1%) - HackerRank

Jan 2024
